Travel Time to Work²

Notes:

Data are from the 1990 Census Transportation Planning Package (CTPP) and the American Community Survey's Census 2000 Supplementary Survey (C2SS). The C2SS sampled 700,000 households across the country. The 1990 CTPP is based on the 1990 Decennial Census "long form" which sampled 1 in 6 households (15.32 million).

Universe: All Workers 16 years and older living in households.

¹Means of Transportation included in the "Transit" category includes Bus or trolley bus; Streetcar or trolley car; Subway or elevated; and Railroad.

²For travel time to work analysis, the 1990 data includes workers both in households and group quarters, while the C2SS data is for workers in households only. For calculating the average travel time, the maximum value used for the 1990 data was 99 minutes, while for C2SS it was 240 minutes.
